

**Inventory of Sites with Identified or Suspected Concerns to the Douglas Indian Association**

Site Number and Name	Coordinates		Use History	Land Ownership	Estimated Area of Impact
	Latitude	Longitude			
1 Jualapa Tunnel	58.317	-134.391	Mining tunnel was formerly used as underground sluice for gold extraction, now transports water supply source into Juneau water distribution system.	City and Burrough of Juneau	1 Acre
2 Perseverance Mill	58.334	-134.292	Tailings disposal site that received ore processing milling residuals in the early 1900s.	City and Burrough of Juneau	1 Acre
3 Treadwell Mine Complex	58.267	-134.381	Former mine facility with associated mill sites. Sediment and water samples at levels of concern to human health and aquatic species.	City and Burrough of Juneau	70 Acres
4 Greens Creek Mine	58.079	-134.631	Active mine with main commodities: Silver, Gold, Copper, Lead, Zinc.	Hecla Mining Company	23 Square Miles
5 Sandy Beach	58.272	-134.381	Former Tlingit village site; currently a popular recreation site. Mine tailings deposited on beach from the Treadwell Mine Complex.	Alaska Department of Natural Resources	30 Acres
6 Gastineau Mine (AK Juneau Rock Dump)	58.288	-134.390	Former gold mine operational until 1951. Recent uses include oil storage, trash dumping, and as a sewage treatment plant for the City of Juneau.	Reed Stoops and Associates	2 Acres
7 Gastineau Mine Tailings	58.258	-134.322	Tailings disposal site received milling residuals from 1912-1920. Elevated lead and arsenic present. Lead was determined to be below ADEC Method 2. No information on arsenic levels.	AJT Mining Company, Inc.	50 Acres
8 Tulsequah Chief Mine	58.717	-133.583	Project consists of two mines operating near the confluence of the Tulsequah and Taku Rivers, British Columbia. Currently, the only means of transportation in the mine site is by air and water.	Chieftain Metals Inc.	35,000 Acres
9 Taku Inlet	58.321	-134.036	Waterway with significant cultural, environmental, and economic value.	State of Alaska	
10 Sunny Cove	58.303	-134.140	Part of waterway with significant cultural, environmental, and economic value.	State of Alaska	10 Acres
11 Grizzly Bar	58.39	-134.039	Part of waterway with significant cultural, environmental, and economic value.	State of Alaska	40 Acres
12 Taku River	58.504	-133.923	Waterway with significant cultural, environmental, and economic value.	State of Alaska	

## Inventory of Sites with Identified or Suspected Concerns to the Douglas Indian Association

Site Number and Name	Coordinates		Use History	Land Ownership	Estimated Area of Impact
	Latitude	Longitude			
13 Berners Bay Camp	58.774	-134.981	Abandoned equipment discovered at site indicated possible mining or logging former site use. Berners Bay is an important eulachon spawning location.		
14 Peter Naoroz Property	58.258	-134.321	Located on the Gatineau Channel within the traditional DIA area. Potentially impacted by heavy metals from near by mining tailings.	Private (Peter Naoroz)	0.5 Acres
15 Nowell Mine Old Mill Site	58.2682	-134.3236	Former stamp mill located on Sheeps Creek. Area impacted by heavy metals above ADEC cleanup levels.	AJT Mining Company, Inc.	5 Acres
16 Sheep Creek Estuary	58.259	-134.327	Located on the Gatineau Channel within the traditional DIA area. Potentially impacted by heavy metals from near by mining tailings.	State of Alaska	20 Acres
17 Herbert River Mines	58.529	-134.682	Located 20 miles northwest of Juneau, the mouth of the Herbert River is an important subsistence area for DIA. Mining was conducted in the area during the 1930s, exploration drilling was conducted in 2010 and 2012. Area encompasses 91 mining claims.	U.S. Forest Service	1881 Acres
18 Capital Landfill	58.352	-134.501	Active solid waste disposal facility for Juneau. Unlined landfill that may impact subsistence resources in Lemon Creek.	Private	40 Acres
19 Old Juneau Dump			Historic Juneau city dump. Potential impacts to subsistence resources.		
20 Eagle River Beach	58.3526	-134.816	Tar substance assumed to be from a historic asphalt batch plant is seeping out of the north bank of Eagle River. Exposure of the material was reported in 2018 after a heavy rains eroded the bank at the Eagle Beach Recreation Area.	Alaska Department of Natural Resources	0.25 Acres
